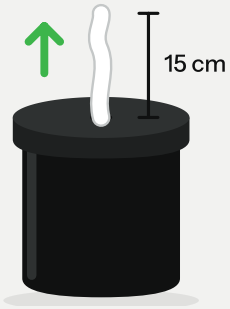
CleanWipe
Sweden AB

How to take a wipe

Three simple steps – and the equipment is clean for the next person.



1

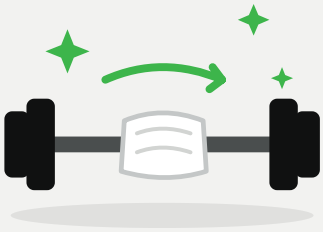
Pull up a wipe

One wipe is about 15 cm. Pull straight up from the hole in the lid.

2

Pull towards the edge

Guide the wipe out to the edge of the lid and it tears off.



3

Wipe the equipment

Handles, seats and pads – everything you trained with.

One wipe is enough for three machines

Thank you for helping us protect the environment.
